

Formspree

 formspree.io/forms/xrbqogkd/integration

Place this URL in the form's **action** attribute, set the method to **POST** , and add a **name** attribute to each input.

Code examples

```
<!-- modify this form HTML and place wherever you want your form -->
<form action="https://formspree.io/f/xrbqogkd" method="POST">
  <label>    Your email:
  <input type="email" name="email">
  </label>
  <label>    Your message:
  <textarea name="message">
  </textarea>
  </label>
  <!-- your other form fields go here -->
  <button type="submit">Send
</button>
</form>
```

Resources

Explore our [help articles](#) for setting up your form, covering everything from using a "reply to" address to integrating reCAPTCHA v3.

The [Form Library](#) is filled with example forms to get you started. Find everything from a contact form to an RSVP form, edit the code live, and download or copy/paste your work.
